

Fig. 8 | Income and physical inactivity independently predict state-level obesity

Left: income composite; right: leisure-time inactivity. Lines = OLS $\pm$ 95% CI; CDC BRFSS 2011–2024.

Fig. 5 | State-level income vs. obesity prevalence

Income step: 1 = $\leq$ \$15k, 6 = $\geq$ \$75k; CDC BRFSS 2011–2024

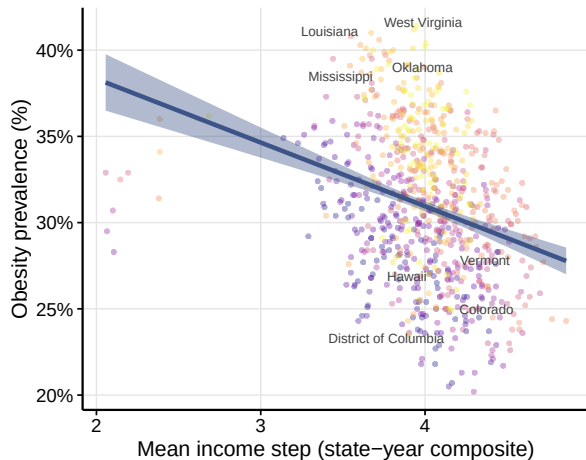

Fig. 6 | Physical inactivity vs. obesity prevalence

State-level estimates; CDC BRFSS 2011–2024
